### Fairness & Integrity Factory Unlimited

Raw proposal for a device to nurture evolution, compatible to now and then level of culture and technology. Utilize a long feasible automaton and its elementary core. Reconcile and adopt emerging representations of what all want: democracy of best technical match. Ever open to individual and team contributors, this factory room dedicates neutral machines to produce durable fairness and integrity. There's no view, strategy, religion, ruleset, policy, law prescribed or underlying or defined constant. Make, bring, decide your favorite, with transparent reciprocal positive transitivity.

Domains of interest process and enact charters, agreements in intervals. The global essential moralethica (Gem) ranks first. Worth the undertaking of Earth to Mars kids from 10, or advocates of any team, variable from 2, allowing flexible delegate tree structures. Reasonably weighted voices generate or vote at their time and wish 10..50 golden rules. Citizens trust & respect the seasonally recalculated top 10..20 of the Gem, and 10..50 in (sub)domains ... Let's call such components of the best match democracy machine here metarules. Resembling preconditions or axioms, to which all value and procedure precepts and operational principles shall conform, they don't include content of the whatever to evolve.

How many of the living things will encounter families of friends of life every where and when. Or, millions & millions of researchers & engineers for 300 no 1000 years, or, 10 million metric tons of pure organic neuron mass delivering 160 gigawatts ... you tell me earthly garden dangers, some basic needs or nonoptimal bioautomaton design problems cannot be solved. Multinational conferences, declarations on the one millionth anniversary of mankind unhappiness encourage to take action together. The Parliament of the World's Religions hopefully initiated its 1993 Global Ethic also toward our planet.

Like with many orgs and initiatives though, traditional schemes often carry at least 3 drawbacks: billions of humans (only) won't accept, own or even know such foundational agreements; could they evolve themselves; select authoring team of some few, perhaps from narrow path of dedicated professions or designated positions. Less spectrum, data, processing node raises error, mission risk, decreases area, reach for our desirable and noble intentions. The United Nations Development Group in some year queried one million of those lightmaking bipeds what all want ... Now why not do it, ongoing, effective in space, time & the power of thinking things of many kind.

An old baby turtle paddles through decades of happening of the night, déjà vu of the season, medium of the year. Then one morning, alpha waves in its brain evoke an integrity factory engine blueprint.

The "OneRemedy" essay and "metarules\_raw\_proposal" offer details. The videos annotated here add water. All can "edit\_the\_machine", that is, contrive metarules. No worries, much of it was not quite my training or business anyway, and without consulting piles of literature, except SciFi of the 20th, because there one returns alive and hearty from 10 trips in the whole universe only, provided the shot before birth time loops could be tackled early enough.

## Annotations

For best experience, don't shuffle the playlist story. Login is not needed, but a few entries can vary with access gear or region or Youtube option, resulting in less clips than this document lists.

Recommended Youtube option: "Restricted Mode: Off". Those bound to Restricted Mode here would formally rank perhaps near medium teenage (eg, no shock moments, violence or other unsolicited explicit presentation).

The per-video annotations following might have a constant prefix:

do value sign creations call

mad corruption then my globe wont see  
no war chains or that depth of poverty  
what means any living thing to man  
when bar precept one through ten

such line of day old or young can say  
much program run machines to play  
let gardens bloom heartwork reign  
wood and vein keep kernels sane

Atropos, Daedalus, Eupraxia, Euthenia, Peisinoë, Phantasos, Zenon – who could have voiced the above?

The following annotations contain at least one good answer.

58. THAILAND'S ELEPHANT ORCHESTRA PLAY 🌟 Kids Age

Please note: Such anthropocentric 'turbo skills' still happen unfortunately often through early physical torture and then conditioning of psyche & behavior. Coercion is visible also in this video. – See for instance:

– the story of Somjai & mahout Chai

Not being included to endorse unethical practice, the video nevertheless can demonstrate (learning) potential of our earthly companions. Though transmuted, shaped strictly to artform of human culture.

(So the non-scientist, non-biologist may quickly recognize along the playlist themes rolled here.

This 'orchestra' was established before the Btm democracy project anyway. Others, serious science researchers, interface with uncivilized animals in their original habitat only, or at least avoid conditioning and coercion.)

On natural capabilities of our brothers, sisters, ancestors to make even artistry contemplated

Hermann Samuel Reimarus in 1760: "General musings on the drives of animals, focusing on artistic drives: towards knowledge of interrelatedness of the world, the Creator and ourselves".

Hardcopy in German: [books.google.com/books?id=c3FRAAAAMAAJ&pg=PAPP5](https://books.google.com/books?id=c3FRAAAAMAAJ&pg=PAPP5)

The academic studied some animals in detail and was convinced they carry some soul, psyche and inner spirit.

With "artistic drive" he wanted to express that like humans other animals in their own way develop skills, and maintain and use them self-contained. It would be also their nature to determine actions themselves.

You will find in numerous videos with unrestricted online access that land and sea birds and mammals react to harmonics, music etc. But who did inspire the first flute player at the cave, or Antonio Vivaldi?

And the yodeler above too produces this tune perhaps only in captivity and certainly deserves coastal shelter like [whalesanctuaryproject.org](https://whalesanctuaryproject.org). Many in the wild engage in chat-singing or karaoke however, and 'our' individual probably adapted essential behavior to changed environment.
